

Durval Myrie:

I was the breadwinner for the family and when I have to sit down for two years, can't do no work, it's very bad. Every time I try to eat, it was blood coming up. Up to now I haven't even recovered because I have to keep on going back to the doctor. I went to Burger King, have a smoothie, me and my wife and the family. When I start drinking the smoothie, I feel something in my throat. I started to cough. It was broke up plastic in the smoothie. I went inside, give it to the supervisor lady and say, "It's bursts of plastic in the smoothie." She's like, "Oh my God, I'm so sorry."

After it happened, she gave me back my money. Give me a number to contact them. They say they'll take full responsibility. When it just happened, I try to reach out with them, try to reach out to corporate and ask them, "Who can I speak to," because they gave me a number to reach out to corporate. "Who can I speak to?" I didn't get no answer. Somebody recommend me to Mr. Keith and say, "He's a good lawyer." He walked me through the process and he take time to listen to his client and go all out for his client.

Corporate didn't want to cooperate with it and it take very, very long time to find these people. One at a time I give up and when he call and say, "Mr. Myrie, we think we are somewhere." And I say, "Thank God. It's over with once and for all." And I thank Mr. Keith law firm very, very much. He's a wonderful lawyer.
